

DELIVERING INTEGRATED PRINT SOLUTIONS

Since 1921, Bramkamp Printing has always strived to give our clients the highest quality printing along with outstanding customer service.

Now Bramkamp is proud to take our commitment to quality one step further—for the earth.

For years we've concentrated on supporting the environment, including green initiatives such as:

-  Soy & vegetable based inks
-  Recycling of pre-consumer and post-consumer paper
-  Corrugated carton recycling
-  Recycling of metal plates
-  Chemistry free plate making
-  Proper fluorescent bulb disposal

Now we're proud to show our support for good forest management by earning certification by the Forest Stewardship Council. The FSC is an international organization that ensures all paper and paper products used by certified members have come from responsibly-managed forests.

We understand that it's not easy being green, but Bramkamp's commitment and new FSC certification means that we've taken an even larger step to saving our planet's resources.

For more information on any of Bramkamp's green initiatives, please contact your representative at 513-241-1865.
